

Enliven Software's ePayables Lite

Take advantage of Enliven Software's electronic workflow for free, when routing invoices sent from vendors using Fidesic. Then, send your payments electronically, however you choose to pay.

How it Works

If your vendor uses the Fidesic eInvoicing solution, and you received their invoice electronically, you are now able to put that invoice through a paperless workflow (with custom rules to mirror your business' existing process) with anywhere, any time approval capabilities.

Is ePayables Lite Right for You?

If you're an existing customer of one of Enliven Software's eInvoicing clients and have more than one person within your business reviewing the invoice to be paid ePayables could help you save a significant amount of time and money processing your payment. If your business has considered a payment automating solution, it's a great opportunity to try paying your invoices electronically and experiment with building and benefitting from an electronic workflow.

Benefits

- It's FREE to existing Enliven clientele's customers
- Provides the ability to send electronic payments
- Electronic custom workflow based on your existing business rules
- Paperless anywhere, any time approvals
- Bullet proof audit trail
- Complete history of invoices and payments made via secure online account center
- Also provides the unique ability to try a paperless payments process with electronic workflow without any cost—only time and cost savings
