

Enliven Software's eDeposits Powered by Heartland Payment Systems

Make Deposits from your Desk

Are you sick of going to the bank? Are you tired of staring at bank account and routing numbers and typing them into your accounting system? What if you could seamlessly import checks into your accounting system and know that the funds would be in your account the next morning, guaranteed?

How it Works

With Enliven Software's Check 21 solution, you can! Enliven will provide your business with a Check 21 Remote Data Capture scanner and the interface in order to automatically move the record of the deposit into your accounting system and to move the funds into your bank by the next day, all in one seamless process.

It's Safer *AND* Easier

Enliven Software's Check 21 Solution enhances your AR processes and allows greater visibility into your receivables. Check fraud is virtually eliminated by the ability to pursue collections with zero effort or expense from your business. Plus, there are significantly less late night or early morning trips to the bank.

Accurate reporting is achieved automatically through direct integration with your accounting system, meaning you never have to type in a check deposit again. Business managers are provided with accurate and almost instantaneous reporting. Best of all, Check 21 scanner can be connected anywhere, anytime because of its secure web-based remote capture technology.

- Fewer trips to the bank
- Lower courier fees
- Faster access to funds
- Greater visibility into AR
- Zero redundant data entry
- Easy-to-use technology means a no-hassle training process for employees
